ABOUT ME

I am a 29-year-old software developer from Lithuania with 8+ years of professional experience and a BSc in Web Development. I specialize in building robust, user-focused and accessible web applications.

My technical expertise spans both frontend and backend development, with particular strength in Vue.js and modern JavaScript frameworks.

I speak fluent English, Lithuanian and I am on on a journey to learn French and Danish.

WORK EXPERIENCE

MyBanker

Frontend developer

2024 May - 2025 Sep

Description:

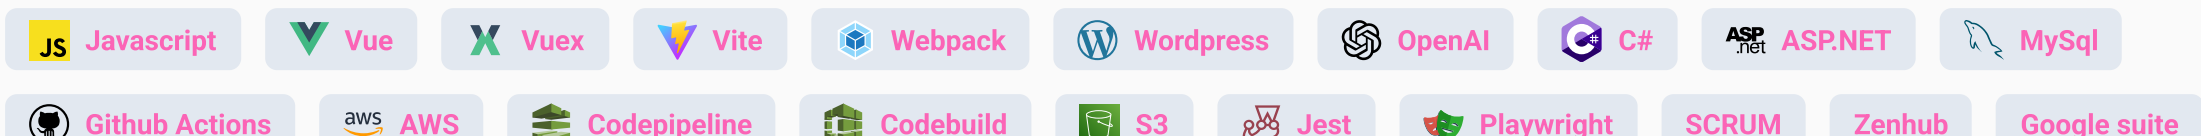

Financial sector. Online comparison platform that helps individuals find and compare financial products such as loans, savings accounts, and banking offers. It also offers consumers financial tools such as loan consolidation.

Technologies:

- Frontend: Vue, Javascript, Wordpress
- Backend: EC2, S3, C#, ASP.NET, MySql
- Operations: Docker, Codepipeline, Codebuild, Github Actions

Responsibilities:

- Creating and maintaining a custom validation solution.
- Initiating, planning and overseeing a migration from Vue2 to Vue3.
- Initiating, planning and overseeing test implementation both for unit tests and E2E tests.
- Testing and deploying releases into production.

Maersk

Software developer

2021 Sep - 2023 Aug

Description:

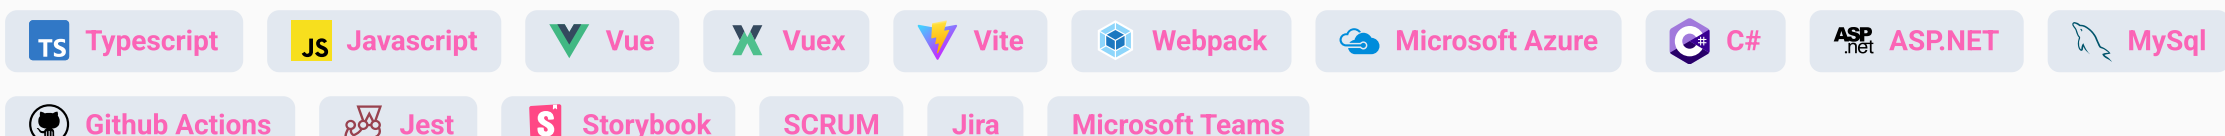

One of the leaders of the shipping and logistics industry.

Technologies:

- Frontend: Vue, Typescript, Javascript, Webpack, Vite
- Backend: Microsoft Azure, C#, ASP.NET, MySql
- Operations: Docker, Github Actions

Responsibilities:

- Rewriting legacy system code that handled container shipping into a Vue project.
- Bootstrapping new Vue3 projects as micro applications into the existing ecosystem.
- Extensive testing using Jest as well as keeping documentation up to date using Storybook.
- Collaborating with Backend developers and Designers to solve complex problems that spanned across multiple teams.

Ericeira surf camp

Freelance developer

2021 Jun - 2021 Aug

Description:

Local Surf and water gear rental business that also provides coaching.

Technologies:

- Core: Wordpress, Squarespace, PHP, HTML, CSS, Javascript, Adobe XD

Responsibilities:

- Aligning expectations and defining deliverables.
- Redesigning the current site and implementing the new design in Wordpress.
- Scouting the competition and improving the SEO.

Wedio

Lead frontend developer

2019 Aug - 2021 May

Description:

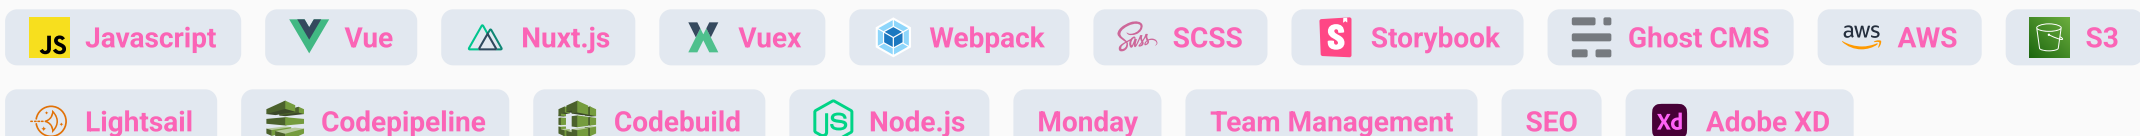

Video and audio gear online rental marketplace.

Technologies:

- Frontend: Nuxt, Vue, Javascript, Vuex, Webpack, SCSS
- Backend: EC2, C#, ASP.NET, Node.js, MySql, S3, Lightsail
- Other: Ghost CMS, Storybook
- Operations: Docker, Github Actions

Responsibilities:

- Building, maintaining and taking full ownership for the Frontend.
- Managing a team of 4 frontend interns.
- Managing, communicating and planning features and releases with stakeholders.
- Working with SEO experts from bonzer.dk to optimize ranking and performance of the website.
- Contributing to the Nuxt.js ecosystem.
- Creating a custom CMS solution for marketing.

Nuvopoint / Tillty

Software developer

2017 Aug - 2019 Apr

Description:

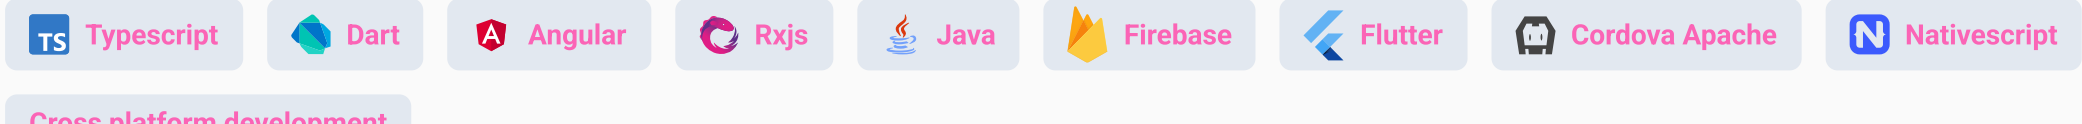

Point of sales system specifically designed for local retailers.

Technologies:

- Frontend: Typescript, Angular, RxJs
- Backend: Firebase, Firestore
- Mobile: Cordova Apache, Flutter, Nativescript, Java

Responsibilities:

- Writing Frontend UI as well as constantly optimizing the code for performance gains
- Planning and setting up the data structures in the frontend using Typescript and aligning them in the backend on firebase.
- Migrating the project to different cross platform technologies.
- Writing plugins for Cordova Apache using Java.

Cross platform development

PERSONAL PROJECTS

Portfolio website

Description:

I originally built this website because updating my CV in Figma was a slow and tortorous task. Since then it has become so much more and I am continously expanding it.

DNA Syntehsizer Audio plugin

Description:

A friend of mine contacted me to make a VST audio plugin that uses DNA information to create sound. Currently I am learning C++ and building it.
